Agricultural Statistics 1991

On the front cover

The front cover shows an outline map of Saskatchewan indicating the nine crop districts and three soil zones. Much of the crop and livestock production data in the handbook is presented by crop district. The soil zone demarcation shows the variation in growing conditions in Saskatchewan.

As most of Saskatchewan's soil is predominantly of loamy texture, production capabilities are determined largely by weather conditions and the presence of organic matter. The brown soil zone covers approximately 22.0 million acres in southwest Saskatchewan. The relatively warm temperatures, lack of moisture and lack of organic matter in this arid region limit crops to small grains and the use of grassland for livestock production.

The dark brown soil zone, covering 18.0 million acres, lies north and east of the brown zone. A small area, with the characteristic cooler temperatures and more moisture, is also evident around the Cypress Hills in southwest Saskatchewan.

The black soil zone covers nearly 26.5 million acres in the north and east of the agricultural area. The growing period is shorter but the lower temperatures and increased moisture allow for a wider variety of cropping practices.

FOREWORD

Agricultural Statistics is a handbook containing Saskatchewan agricultural statistics. Agricultural Statistics 1991 is our sixteenth statistical handbook and includes the latest statistics on the agricultural financial situation, crops, livestock and weather and climate.

Sources of the information contained in this handbook include Statistics Canada, Agriculture Canada, Canada Grains Council, Canadian Wheat Board, Canadian Grain Commission, Environment Canada, Farm Credit Corporation, Manitoba Department of Agriculture, Saskatchewan Crop Insurance Corporation, Agricultural Credit Corporation of Saskatchewan, Saskatchewan Water Corporation, SPI Marketing Group, Saskatchewan Sheep Development Board, Saskatchewan Beef Stabilization Board, Saskatchewan Milk Control Board, Saskatchewan Turkey Producers Marketing Board, Saskatchewan Chicken Marketing Board, Saskatchewan Commercial Egg Producers Marketing Board, Natural Products Marketing Council, Saskatchewan Bureau of Statistics, Saskatchewan Economic Development and the Branches of Saskatchewan Agriculture and Food.

We hope the handbook will be useful to agriculture's decision-makers--producers, agribusiness, government. We welcome suggestions for changes and improvements. If you have any comments or enquiries, please contact:

45. Specialty Crops Area Seeded, Saskatchewan, 1971-91.....	78
46. Specialty Crops Yields, Saskatchewan, 1971-91.....	79
47. Specialty Crops Prices, Saskatchewan, 1971-91.....	79
48. Forage Seed Production, Saskatchewan, 1982-91.....	80
49. Wild Rice Acreage, Production and Value, Saskatchewan, 1975-91.....	81
50. Average Dates of Seeding and Harvesting Operations for Spring Wheat, Saskatchewan, 1952-91.....	82
51. Average Protein Content of Hard Spring Wheat, Saskatchewan, by Crop District, 1987-91.....	83
52. Spring Wheat Grades, Saskatchewan, 1982-91.....	83
53. Grades of Grains and Oilseeds, Saskatchewan, 1990-91.....	84
54. Spring Wheat Grades, Saskatchewan, by Crop District, 1991.....	84
55. Stocks of Crops on Farms, Saskatchewan, July 31, 1960-91.....	85
56. Farm Supply and Disposition of Major Crops, Saskatchewan, Crop Years 1987-88 to 1990-91.....	86
57. Canadian Wheat Board Payments for Wheat and Durum, Basis in Store Thunder Bay, Crop Years 1971-72 to 1991-92.....	87
58. Canadian Wheat Board Payments for Oats, Basis in Store Thunder Bay, Crop Years 1971-72 to 1988-89.....	88
59. Canadian Wheat Board Payments for Barley, Basis in Store Thunder Bay, Crop Years 1971-72 to 1991-92.....	89
60. Average Canadian Wheat Board Selling Quotations, Basis in Store Thunder Bay, Crop Years 1975-76 to 1990-91.....	90
61. Average Saskatchewan Wheat Pool Street Price Quotations, Crop Years 1975-76 to 1990-91.....	90
62. Canadian Wheat Board Prices, Basis Thunder Bay, Crop Years 1990-91 and 1991-92.....	91
63. Primary Elevator Handling Charges, Saskatchewan Wheat Pool, Crop Years 1982-83 to 1991-92.....	92
64. Grain and Oilseed Freight Rates, from Saskatoon, Crop Years 1982-83 to 1991-92.....	93
65. Number and Capacity of Licensed Primary Elevators, Saskatchewan and Prairies, August 1, 1971-91.....	93
66. Canadian Wheat Board Cash Advances to Producers, Western Canada, Crop Years 1957-58 to 1990-91.....	94
67. Western Grain Stabilization Program, 1976 to 1990-91.....	95
68. Saskatchewan Crop Insurance Program, Crop Years 1961-62 to 1990-91.....	96

LIVESTOCK AND POULTRY

69. Livestock on Farms, Saskatchewan, June 1, 1916-73, July 1, 1974-91.....	97
70. Average Livestock Prices, Saskatchewan, 1931-91.....	99
71. Livestock Marketed, Saskatchewan, 1976-91.....	100
72. Cattle on Farms, Saskatchewan, June 1, 1932-73, July 1, 1974-91.....	101

73. Cattle on Farms, Saskatchewan, by Crop District, June 3, 1981 and 1986 and June 4, 1991.....	102
74. Cattle on Farms, Saskatchewan, December 1, 1941-72, January 1, 1974-92....	105
75. Origin of Cattle Marketed, Saskatchewan, by Crop District, 1990-91.....	106
76. Destination of Saskatchewan Cattle Marketed, 1987-91.....	107
77. Monthly Average Saskatchewan Railgrade A1 Steer Price, 1987-91.....	107
78. Saskatchewan Cattle Prices, 1987-91.....	108
79. Pigs on Farms, Saskatchewan, June 1, 1932-73, July 1, 1974-91, December 1, 1932-72, January 1, 1974-92.....	109
80. Pigs on Farms, Saskatchewan, by Crop District, June 3, 1981 and 1986 and June 4, 1991.....	111
81. Pigs Marketed through SPI Marketing Group by Size of Producer Marketings, 1987-91.....	112
82. Origin of Pigs Marketed through SPI Marketing Group by Crop District, 1987-91.....	113
83. Destination of Pigs Marketed through SPI Marketing Group, 1987-91.....	113
84. Index of Pigs Marketed through SPI Marketing Group 1987-91.....	114
85. Monthly Average Index 100 Hog Price, Saskatchewan, 1989-91.....	115
86. Hog-Barley Ratio, Winnipeg, by Month, 1971-91.....	115
87. Sheep on Farms, Saskatchewan, June 1, 1932-73, July 1, 1974-91, December 1, 1940-72, January 1, 1974-92.....	116
88. Sheep and Lambs Marketed by the Saskatchewan Sheep Development Board, 1975-91.....	117
89. Sheep on Farms, Saskatchewan, by Crop District, June 3, 1981 and 1986 and June 4, 1991.....	118
90. Average Monthly Heavy Lamb Price, Saskatchewan, 1987-91.....	119
91. Production, Value and Disposition of Shorn Wool (Greasy Basis), Saskatchewan, 1982-91.....	119
92. Farm Sales of Milk and Cream, Saskatchewan, 1982-91.....	120
93. Cash Receipts from Sales of Milk and Cream, Saskatchewan, 1982-91.....	120
94. Saskatchewan Farm Cream Sales, 1972-91.....	120
95. Saskatchewan Milk Production and Value, 1971-91.....	121
96. Saskatchewan Milk Producers by Quota Area, at August 1, 1986-91.....	121
97. Saskatchewan Milk Sales, 1971-91.....	122
98. Average Milk Pool Producer Price, Saskatchewan, 1971-91.....	122
99. Average Monthly Group I Milk Pool Producer Price, Saskatchewan, 1987-91..	123
100. Chickens and Turkeys Placed in Saskatchewan, 1987-91.....	124
101. Fowl and Chicken Production, Saskatchewan, 1976-91.....	124
102. Turkey Production, Value and Disposition, Saskatchewan, 1976-91.....	125
103. Hatchery Production, Saskatchewan, 1987-91.....	125
104. Poultry Marketings Through Registered Processing Stations, Saskatchewan, 1987-91.....	125
105. Interprovincial Movement of Chicks, Poults and Eggs, 1990-91.....	126
106. Registered Chicken Production and Value, Saskatchewan, 1976-91.....	126
107. Distribution of Registered Chicken Quota Holdings at January 1, Saskatchewan, 1988-91.....	127
108. Registered Chicken Marketings by Class, Saskatchewan, 1987-91.....	127
109. Saskatchewan Chicken Marketing Board Prices, Live, F.O.B. Farm, 1987-91..	128
110. Registered Turkey Production and Value, Saskatchewan, 1976-91.....	129
111. Registered Turke, Marketings by Class, Saskatchewan, 1987-91.....	129
112. Destination of Registered Turkey Marketings, Saskatchewan, 1987-91.....	130
113. Saskatchewan Turkey Producers Marketing Board Prices, Live No. 1, F.O.B. Farm, 1987-91.....	130

114. Egg Production and Disposition, Saskatchewan, 1976-91.....	131
115. Registered Egg Production and Value, Saskatchewan, 1976-91.....	132
116. Distribution of Registered Egg Quota Holdings at January 1, Saskatchewan, 1987-91.....	132
117. Monthly Average Egg Price (Grade A Large) to Producers, Saskatchewan, 1987-91.....	133
118. Honey and Beeswax Production, Saskatchewan, 1971-91.....	134
119. Saskatchewan Livestock Stabilization Programs, Year Ending March 31, 1977-91.....	135

133. Climate Normals (1951-80): Frost-free Season and Growing Degree Days for Selected Reporting Stations.....	152
134. Metric Conversion Factors Used.....	153

1991 AGRICULTURE NEWS REVIEW

January

- 7 - National Defence Minister Bill McKnight and Saskatchewan minister responsible for Saskatchewan Economic Development Corporation (SEDCO) Rick Swenson announced that the province's first federally inspected game meat processing facility--**Buffalo Meadows Game Meat Processors Inc.**--would be established at Langham, west of Saskatoon.
- 10 - Saskatchewan Associate Minister of Agriculture and Food Harold Martens announced that the provincial government would establish a producer operated canola development agency empowered to collect a "checkoff" from canola sales and use the funds for canola research and development projects and market promotion. The **Saskatchewan Canola Development Commission** began collecting a fifty cent per tonne checkoff May 1, 1991. The checkoff is refundable to those producers who do not wish to contribute.
- 11 - Saskatchewan Premier Grant Devine announced that Saskatchewan reached agreement with other provinces and the federal government on the GRIP and NISA grains and oilseeds safety net program. Effective the 1991-92 crop year the **Gross Revenue Insurance Plan (GRIP)** would provide revenue protection by offering price support in addition to yield protection under crop insurance. GRIP would provide a target revenue based on historic yields and a 15-year indexed moving average price and make a payment when market revenue fell below the target revenue. The cost sharing for revenue protection would be approximately 33 per cent by farmers, 25 per cent by the province and 42 per cent by the federal government. Crop insurance premium shares would remain unchanged at 50 per cent producer and 25 per cent for each level of government. Effective the 1990 tax year, the **Net Income Stabilization Account (NISA)** enables farmers to contribute to interest-bearing individual accounts, matched by the federal and provincial governments, and trigger fund withdrawals when taxable income fell below \$10 000 or the previous five-year average.
- 23 - Saskatchewan Premier Grant Devine officiated at the opening of **Esso Ag-Biologicals** in Saskatoon. The project would work on developing biological products to promote plant growth.
- **temperatures** averaged well below normal during the first two weeks of January, warmed up at mid-month and were above normal on most days for the remainder of the month. On numerous days, temperatures were above freezing. For the month, temperatures averaged normal to three degrees above the January normals. Normal highs range from -7°C to -13°C in the south and -12°C to -16°C in the north while normal lows range from -18°C to -24°C in the south and -23°C to -27°C in the north. Snow was reported on most days during January but amounts were very light, often only a trace. January **precipitation** was 20% to 50% of normal throughout most of Saskatchewan. In western regions, precipitation was 15% of normal while eastern locations received up to 85% of normal January precipitation. Most of Saskatchewan normally receives 15 mm to 20 mm during January, with 20 mm to 25 mm in the northwest and in the east and 25 mm to 30 mm in the southwest corner. At month-end, snow cover ranged from 7 cm at Kindersley and at Broadview to 55 cm in the Nipawin area. Most of the province had less than 20 cm on the ground.

February

- 1 - the Agricultural Stabilization Board announced an **Agricultural Stabilization Act (ASA)** payment of \$19 million to eastern crop producers for soybeans marketed in the 1989-90 crop year. There was no payment for grain corn, winter or spring wheat, oats or barley because the market price exceeded the support price.
- the Canadian Dairy Commission announced that the target price for **industrial milk** would be maintained at \$48.69/hl for the remainder of the 1990-91 dairy year (August 1 - July 31).
- 5 - Canadian Prime Minister Brian Mulroney issued a communique confirming that Canada, United States and Mexico would begin talks towards a trilateral North American trade pact.
- **hog stabilization** payments totalling \$372 thousand were mailed to participants of the Saskatchewan Hog Assured Returns Program (SHARP) for the October-December 1990 program period. The level of SHARP payout reflected the phase-down of SHARP toward full participation in the National Tripartite Hog Stabilization Program (NTHSP). Saskatchewan joined the NTHSP in 1986 and announced termination of SHARP effective March 31, 1991. SHARP was implemented in 1976.
- 11 - the National Tripartite Stabilization Program announced a **lamb stabilization** payment of \$17.87 per lamb for the September-November 1990 program period and a **hog stabilization** payment of \$1.12 per hog for the October-December 1990 program period. The program also announced that no payment would be made for **feeder cattle** or **slaughter cattle** for the last three months of 1990 and that no payment would be made under the **cow-calf** program for 1990 because the national average market prices exceeded the support prices. Total payouts to Saskatchewan participants were \$390 thousand.
- 20 - Saskatchewan Finance Minister Lorne Hepworth announced a package of pre-budget financial initiatives including two-stage harmonization of the provincial sales tax (PST) with the federal Goods and Services Tax (GST)--effective April 1, 1991, the PST base would be broadened to include most goods and effective January 1, 1992, full harmonization would occur through joint administration under a common set of tax rules; an increase in the high-income surtax effective January 1, 1991; an increase in the **Corporate Capital** and **Corporate Income Tax** rates effective January 1, 1992; introduction of a quarterly refundable child tax credit to lower-income families effective April 1, 1991; elimination of severance packages for MLA's, roll-back of MLA salaries to 1990 levels and freezing of the salaries until the provincial budget is balanced and expenditure reductions in most government departments.
- GATT (General Agreement on Tariffs and Trade) Director-General Arthur Dunkel reported that the Uruguay Round participants had agreed to negotiate toward a farm reform pact that addresses export subsidies, internal supports and market access. The talks were adjourned in December 1990 when the EC (European Community) was not willing to accept the proposed level of cuts in farm supports.
- 21 - Saskatchewan minister responsible for the Saskatchewan Wetland Conservation Corporation Lorne Kopelchuk announced a pilot project under the **North American Waterfowl Management Plan (NAWMP)** to provide incentives to seed land around

sloughs to grass or legumes. The Ducks Unlimited administered project was designed to produce waterfowl nesting areas and reduce soil degradation from erosion.

- 26 - Federal Finance Minister Michael Wilson presented the **1991 Budget** which emphasized economic recovery through lower spending, balanced budgets and debt reduction. The proposals included legislated mandatory program spending limits, establishment of a Debt Servicing and Reduction Fund from GST revenues, and freezing of government operating budgets and wages and salaries of all Cabinet Members, Members of Parliament and Order-in Council appointments. No major tax increases were announced but increases in the unemployment insurance premium rates and excise tax on tobacco were included in the budget speech. The budget also included allocating \$1.3 billion to finance the farm support programs--GRIP and NISA.

- February temperatures averaged above normal and most of the province received above normal snowfall during the month. Above zero **temperatures** during the first week were well above normal at record or near record levels. Temperatures dropped to more normal levels until mid-month when daytime highs again exceeded freezing. During the last week of the month, temperatures fluctuated around the zero mark before dropping to below zero at month-end. Normal highs range from -2°C in the southwest to -10°C in the north while normal lows range from -13°C in the southwest to -23°C in the north. The melting temperatures during the first half of February resulted in bare fields across much of southern Saskatchewan. **Snowfall** amounts were light, infrequent and scattered until the weekend of the 23rd. Snow was reported on most days and in most locations during the last week. As a result, February precipitation amounts were normal or above normal for much of the province. Snowfall was nearly twice normal in north central regions. Along the Alberta border however, and in the southeast precipitation ranged from 55% to 85% of normal. Normal February precipitation is 15 mm to 20 mm in Saskatchewan. At month-end, western Saskatchewan and southeast regions had 5 cm to 10 cm of snow cover while the area north and east of a North Battleford-Yorkton line had at least 25 cm. Up to 50 cm was recorded in the northeast at Nipawin.

March

- 4 - Federal Agriculture Minister Don Mazankowski tabled the **Farm Income Protection Act (FIPA)** bringing together existing safety net programs-crop insurance, Agricultural Stabilization Act, WGSA-under one act and provide for the implementation of GRIP and NISA. The bill was passed into law April 11, 1991.
- 15 - Federal Agriculture Minister Don Mazankowski and Saskatchewan Premier Grant Devine announced the establishment of the **International Centre for Agricultural Science and Technology**. The centre, located in Saskatoon would develop, utilize and commercialize agri-food technology and products for promotion in international markets.
- a second round of discussions on accelerated tariff removal under the Canada-U.S. Free Trade Agreement resulted in agreement to reduce **canola and canola product U.S. import tariffs** by fifty per cent effective July 1, 1991 and remove all tariffs January 1, 1992. Current tariff charges are \$7.05 per tonne for canola, \$2.12 per tonne for meal and 5.2% for canola oil.
- 25 - the National Tripartite Stabilization Program announced an interim payment of

\$2.45 per cwt. for white pea beans marketed between August 1, 1990 and March 15, 1991. Manitoba and Ontario participate in the **national tripartite white pea bean stabilization plan**.

- 27 - Federal Grains and Oilseeds Minister Charles Mayer announced a \$158 million interim payment under the **Western Grain Stabilization Program (WGSA)** for the 1990-91 crop year. Saskatchewan participants received \$80.5 million. Mr. Mayer announced December 20, 1991 that an overpayment of \$41 million had occurred due primarily to an under-estimate of crop year deliveries and an over-estimate of farm input costs. WGSA was implemented in 1976 as a voluntary program, funded jointly by producers and the federal government, within the Canadian Wheat Board region and was terminated July 31, 1991 with the August 1, 1991 implementation of the tripartite Gross Revenue Insurance Plan (GRIP).
- 28 - Federal Agriculture Minister Don Mazankowski announced a \$7.9 million program to assist potato growers who incurred losses due to implementation of the **PVY^a virus eradication** program. Under the eradication program, producers were required to dispose of infected seed potatoes. Agriculture Minister Bill McKnight announced May 17, 1991 that a total of \$11 million would be paid out in compensation to P.E.I., New Brunswick, Ontario and Alberta growers.
- the Agricultural Stabilization Board announced an **Agricultural Stabilization Act (ASA)** payment of \$511 thousand to eastern crop producers for canola marketed in the 1988-89 and 1989-90 crop years.
- Below normal **temperatures** at the end of February continued into the first week of March. Daytime highs were above normal for most of the remainder of the month while nighttime temperatures continued normal or below normal until mid-month. As a result, temperatures averaged 2 to 3 degrees above normal in most locations and near normal in more northerly areas. Normal highs range from 3°C in the southwest to -4°C in the north while normal lows range from -8°C in the southwest to -17°C in the north. With the exception of the area south of Highway No. 1 which received a heavy snow through the 25th-27th period, most of the province received from 40% to 60% of normal March **precipitation**. Less than a third of normal precipitation was received in the northeast and in west central Saskatchewan. Normal March precipitation ranges from 15 mm to 20 mm in most of the province and 25 mm to 30 mm in eastern areas. Above freezing temperatures for most of the month, including the days following the late March snow, melted all the snow and resulted in bare fields in all areas except north of a North Battleford-Yorkton line where snow cover varied from 2 cm to 17 cm. **November 1990-March 1991 winter precipitation** was 50% to 75% of normal for much of Saskatchewan. However, south of a line through Maple Creek to Yorkton accumulations were near or above normal. Isolated locations in central and northwestern areas also received normal or above normal winter precipitation amounts.

April

- 4 - the Ontario Wheat Producers Marketing Board (OWPMB) received an interim payment of \$28 million under the **Agricultural Products Cooperative Marketing Act (APCMA)** to cover the 1990-91 deficit. The deficit occurred because wheat prices were below the initial payment.
- 10 - the National Tripartite Stabilization Program announced an interim payment of \$2.43 per cwt. for colored beans marketed between August 1, 1990 and April 9, 1991. Saskatchewan joined the **national tripartite colored bean stabilization**

plan in 1988.

- 11 - the federal government approved the rail freight rate scale for the 1991-92 crop year. The average western freight rate for 1991-92 was set at \$32.17 per tonne, up from \$31.76 per tonne in 1990-91. The producer's share for moving grains and oilseeds, under the Western Grain Transportation Act (WGTA), increased from \$10.70 per tonne to \$11.07 per tonne while the federal government share increased from \$21.06 per tonne to \$21.10 per tonne.
- 15 - Saskatchewan Premier Grant Devine introduced the **Agricultural Safety Net Act** and amendments to the **Farm Financial Stability Act** in the Saskatchewan legislature. The safety net bill would provide for implementation of the Gross Revenue Insurance Plan (GRIP) and Net Income Stabilization Account (NISA) while amendments to the Farm Financial Stability Act included provisions for the continuation of the **Counselling and Assistance for Farmers (CAFF) Program**. The Acts received Royal Assent June 18, 1991.
- 18 - Federal Agriculture Minister Don Mazankowski, Grains and Oilseeds Minister Charles Mayer and Minister of State for Agriculture Pierre Blais announced the **Farm Support and Adjustment Measures (FSAM) Program**. The program included reductions in the farmer's and province's share of the 1991 GRIP-revenue premiums, incentives to producers and provinces to join the NISA program, extension of the **Cash Flow Enhancement Program (CFEP)** providing for up to \$50 thousand interest-free cash advances on the 1991 crop, targeted assistance to horticulture and additional funding to the **Permanent Cover Program**.
- 22 - Saskatchewan Finance Minister Lorne Hepworth presented the **1991 Budget** to address budget deficits and the provincial debt. The points of the financial plan included: establishing deficit targets including a balanced budget in 1993-94, limiting public sector wage increases to two per cent in each of the next two years, limiting operating grant increases to three per cent in each of the next two years, no tax increases for the next three years, freezing or reducing grants to non-government organizations and arranging for an improved Equalization program with the federal government.
- April averaged warmer and wetter than normal. **Temperatures** averaged normal or above normal for most of the month but dropped to below normal on the 25th when a major disturbance moved into the province. Average temperatures for the month ranged from one degree above normal in the northwest to four degrees above normal in southern areas. Normal highs range from 8°C to 10°C while normal lows range from -2°C to -4°C. **Precipitation** was generally light and scattered until mid-month when most of the province received snow or rain. Amounts however were light, ranging from a trace in the west to 15 mm in eastern areas. A disturbance moved into the province late on the 25th and covered most of the province for the next three days before clearing started at month-end. The storm which moved from west to east produced wet snow in the west and mostly rain in the east. Only the extreme southwest corner missed out while over 100 mm was reported in northwestern locations. On average, the Saskatchewan grainbelt received about 40 mm. As a result of the snow and rain, April precipitation accumulations ranged from normal in the southwest to nearly four times normal in the northwest, at Lloydminster. Most of the province received two to three times normal April precipitation. Normal April precipitation is 20 mm to 25 mm in most locations, 18 mm to 20 mm in central and west-central Saskatchewan and 30 mm to 35 mm across the south. A month-end, points west of a line from Moose Jaw through Prince Albert, had at least

a trace of snow on the ground. Twenty-six cm was recorded at Lloydminster. The snow and rain greatly improved Saskatchewan soil moisture conditions following a fall and winter of below normal precipitation.

May

- 3 - Federal Minister for International Trade Michael Wilson announced that Canadian **import licences** would no longer be required for wheat and wheat products imported from the U.S. and that import licences will still be required for barley and barley products. Under the Canada-U.S. Free Trade Agreement, Canada is required to remove import restrictions if, for two years, Canadian support levels exceed U.S. levels. The results of the Canadian and U.S. support level calculations for 1988-89 and 1989-90 crop years showed average Canadian support at 31.12% for wheat and 18.89% for barley and U.S. support at 26.80% and 26.46%, respectively.
- **hog stabilization** payments totalling \$320 thousand were mailed to participants of the Saskatchewan Hog Assured Returns Program (SHARP) for the January-March 1991 program period. The level of SHARP payout reflected the phase-down of SHARP toward full participation in the National Tripartite Hog Stabilization Program (NTHSP). Saskatchewan joined the NTHSP in 1986 and announced termination of SHARP effective March 31, 1991. SHARP was implemented in 1976.
- the National Tripartite Stabilization Program approved a **lamb stabilization** payment of \$20.44 per lamb for the December 1990-February 1991 program period. The program also announced that no payment would be made for **hogs, feeder cattle or slaughter cattle** for the first three months of 1991 because the national average market prices exceeded the support prices. Total payouts to Saskatchewan participants were \$52 thousand.
- 13 - the Right Hon. Ray Hnatyshyn read the **Throne Speech** opening the Third Session of the Thirty-Fourth Canadian Parliament. Highlights included constitutional reform, job creation, removal of interprovincial trade barriers, a North American trade pact and a new global trading agreement, controls on government spending, continuing privatization and servicing the national debt.
- 15 - The Globe and Mail reported that United Grain Growers Ltd. had sold its **United Oilseed Products Ltd.** canola crushing plant to Archer-Daniels-Midland Co. (ADM) of Illinois. The plant was closed in November 1990.
- May averaged slightly warmer and much wetter than normal throughout most of Saskatchewan. **Temperatures** were below normal under cool and cloudy conditions for the first ten days of May. Normal or above normal temperatures and rain and showers were common throughout the rest of the month. Average temperatures for the month were about one degree above the normals. Normal highs range from 17°C to 19°C while normal lows range from 3°C to 5°C. **Precipitation** was generally light and scattered until the 11th when thundershowers moved into southern Saskatchewan and covered the province by the 13th. With the exception of two or three days around mid-month, thundershowers or rain were common across the province. By month-end most of Saskatchewan had received at least ten percent above normal rainfall amounts, with central regions receiving up to two to three times normal amounts. Over 120 mm, nearly four times normal, was received at Elbow during May. With the exception of general rains on a couple of occasions, most of the month's precipitation came in the form of thundershowers. As a result, some areas did not receive normal amounts. These

included locations such as North Battleford, Hudson Bay and areas along the U. S. border. On average, the Saskatchewan grainbelt received at least 35 mm. Normal May precipitation is 35 mm to 40 mm in most locations, 45 mm to 50 mm in southern and east central Saskatchewan and 30 mm to 35 mm across central and west central regions. Nine tornadoes, causing minimal damage, were reported near eight southern Saskatchewan communities on the 28th. In spite of the delays due to the rain and thundershowers, by month-end Saskatchewan farmers had seeded 95 percent of the 1991 crop.

June

- 3 - Saskatchewan Premier Grant Devine announced the establishment of an **Animal Industry Research Chair** in the College of Agriculture Department of Animal and Poultry Science and funding of \$1.2 million for beef industry research. The money came from surplus marketing funds collected by the Saskatchewan Beef Stabilization Board to support the board's marketing and promotion programs. The Saskatchewan Beef Stabilization programs terminated in 1990 to facilitate Saskatchewan's participation in the National Tripartite Beef Stabilization Program.
- CSP Foods Ltd. and Central Soya Canada Ltd. signed a letter of intent to purchase the edible oil business of Maple Leaf Foods Inc. (Canada Packers Ltd.) **CanAmara Foods Ltd.** was created March 19, 1992 from the merger of CSP and Central Soya and the purchase of the Canada Packers operation and would operate five crushing plants and five vegetable oil refineries from Quebec through Alberta.
- 14 - the binational Canada-U.S. Extraordinary Challenge Committee, formed under the Canada-U.S. Trade Agreement, dismissed a U.S. Extraordinary Challenge to a February 12, 1991 U.S. International Trade Commission (ITC) ruling that Canadian subsidies on fresh chilled and frozen pork do not materially injure U.S. pork producers. A Canada-U.S. Binational Panel (#11) concluded January 22, 1991 that the ITC could not prove threat of injury and gave the ITC another opportunity to examine its evidence. As a result of the ruling, the U.S. would have to lift the **countervailing duties** on imports of Canadian pork and duties collected since August 1989 would be refunded to producers. Saskatchewan producers received refunds of \$959 million in September 1991. The ruling did not affect live hog duties.
- the United States Department of Commerce review (#4) of **hog countervailing duties** set the 1988-89 duty at 4.49 cents per pound for live hogs entering the U.S. The U.S. has imposed duties on live hogs from Canada since 1985 when it ruled that Canadian subsidies hurt U.S. producers by forcing them to compete with lower cost imports.
- June was generally cool, cloudy and wet across Saskatchewan. Under cloudy skies, temperatures averaged within a few degrees of normal on most days. There were only four to five days in which the entire province was relatively cloud free. With few exceptions, average **temperatures** for the month were one to two degrees above normal. Normal highs range from 21°C to 24°C while normal lows range from 8°C to 10°C. **Precipitation**, almost daily somewhere in the province, came in the form of light showers, heavy thunderstorms and general rain. The heaviest rainfall came during the last week of the month when a disturbance moved into the province on the 28th and continued through the July long weekend. The heaviest rains were reported in southern regions and caused

extensive flood damage to houses (particularly in Regina which received 91 mm in the 72 hour period), crops, roads, bridges and railway tracks. As a result of almost continuous showers and the fairly general rain of the last week, most of Saskatchewan received above normal and near record rainfall during June. A small area in south central Saskatchewan-including Yellow Grass-and a large area of the northwest, North Battleford-Meadow Lake, received near but below normal June precipitation. Numerous locations throughout south and central Saskatchewan received twice normal June rain. Three times normal (193 mm) was recorded at Aneroid while Swift Current and Saskatoon recorded nearly three times normal. Normal June precipitation is 60 mm to 70 mm in most areas, while west central regions receive 50 mm to 60 mm and areas in the northwest, east and southeast normally receive 70 mm to 80 mm. Almost all of the area south of a line from Kindersley-Prince Albert-Pelly received at least 200 mm during the April-June 1991 period, about twice the normal amounts. Record amounts were received at Swift Current (357 mm), Regina (329 mm), Saskatoon (278 mm) and Broadview (256 mm). Only the Meadow Lake area recorded below normal April-June rainfall (97%). As a result of the June rains, only the northwest reported dry moisture conditions, seeding was delayed, many south and central first cut hay was deteriorating in the swath and farmers were unable to complete spraying operations. Damage during the month also occurred from strong winds, funnel clouds and tornadoes which were reported near Indian Head and Regina in the south, Coleville in the west and the Langham-Borden region.

July

- 1 - Saskatchewan minister responsible for SaskTel, Gary Lane announced **long distance rate** reductions ranging from four per cent to 17 per cent.
- 8 - Federal Agriculture Minister Bill McKnight and Saskatchewan Associate Minister of Agriculture and Food Harold Martens announced a one-year \$4.48 million **Canada-Saskatchewan Agreement on Environmental Sustainability** providing funds for projects which support effective resource management and environmentally sustainable agriculture practices. The projects included research into biological pest control, agricultural chemical collection program, production of soil resource maps and production of educational material.
- 9 - Saskatchewan Premier Grant Devine and Dr. George Ivany, president of the University of Saskatchewan signed a five-year \$17.5 million contract for **strategic research** in agriculture and food.
- 11 - the General Agreement on Tariffs and Trade (GATT) Council adopted the August 1990 GATT panel report that said a provision of U.S. trade law was incorrectly applied against imports of Canadian pork. The GATT ruled that the U.S. was inconsistent with its GATT obligations when it deemed that hog subsidies were automatically passed through to pork processors. The GATT decision complemented the June 14, 1991 Canada-U.S. Extraordinary Challenge Committee decision which rescinded the **pork countervailing duty**.
- 22 - the Western Producer reported that the Canadian International Trade Tribunal extended the **countervailing duty** of 85 cents per pound on imports of subsidized EC beef for an additional five years. The duty was implemented July 25, 1986 in response to concerns that EC beef was injuring the Canadian beef industry.
- 23 - the Western Producer reported start up of Pound-Maker Ethanol Ltd. at Lanigan. The \$12 million ten-million-litre-a-year **ethanol plant** is a joint venture of

Pound-Maker Investments Ltd., Saskatchewan Wheat Pool and Mohawk Oil Co. The plant is fully-integrated with the 17 000 head feedlot which uses the byproducts of the ethanol production.

- 25 - Federal Grains and Oilseeds Minister Charles Mayer announced **1991-92 initial payments** for the base grades of each of the four Canadian Wheat Board pool accounts. Initial payments were set at \$95.00 per tonne (\$2.59/bu.) for No. 1 C.W.R.S. Wheat basis Thunder Bay; \$90.00 per tonne (\$2.45/bu.) for No. 1 C.W.A.Durum; \$70.00 per tonne (\$1.52/bu.) for No. 1 C.W. Barley and \$90.00 per tonne (\$1.96/bu.) for Special Select C.W. 2-Row Designated Barley basis Thunder Bay. The initial payments were down 30% for wheat, 28% for durum, 22% for barley and 28% for designated barley from 1990-91 initial payments. The initial payments for all grades in each of the pools were announced by the Canadian Wheat Board July 30, 1991. Mr. Mayer announced November 25, 1991 an increase in the initial payment for designated barley. The increase of \$20.00 per tonne (\$0.44/bu.), effective December 3, 1991, brought the initial payment for Special Select C.W. 2-Row to \$110.00 per tonne (\$2.40/bu.) basis Thunder Bay. Mr Mayer announced December 20, 1991 initial payments increases for wheat, barley and designated barley. Effective January 2, 1992 initial payments were \$101.00 per tonne (\$2.75/bu.) for No. 1 C.W.R.S. Wheat basis Thunder Bay; \$76.00 per tonne (\$1.66/bu.) for No. 1 C.W. Barley and \$122.00 per tonne (\$2.66/bu.) for Special Select C.W. 2-Row Designated Barley basis Thunder Bay.
- 31 - the Canadian Wheat Board (CWB) announced that farmers unable to fill their wheat and barley quotas could apply for a **deferred delivery permit**. The CWB would permit producers to deliver and store on unfilled quotas until August 16, 1991 if delivery could not have been made by July 31.
- the Canadian Dairy Commission (CDC) announced that the **target price** for industrial milk would be increased from \$48.69/hl to \$49.92/hl effective the new dairy year, August 1, 1991.
 - the heavy rainfall which moved into the province at the end of June continued through the July long weekend. Thereafter, over the first three weeks, isolated thundershowers were received almost daily somewhere in the province. Heavy hail, thunderstorms and tornadoes were received in southern Saskatchewan on the 6th. Twisters were reported at Briercrest, Avonlea and Moose Jaw and at Creelman pea and marble size hail damaged cars, trailers, trees, buildings and crops. Thunderstorms, hail and tornadoes knocked out power, destroyed crops and damaged buildings in southeast Saskatchewan on the 15th. For the most part, the final ten days of the month had normal to above normal temperatures under clear skies. July **precipitation** was above normal for much of the southern half of Saskatchewan, ranging from 10% above normal in the southwest to nearly three times normal at Yellow Grass, in the southeast. With few exceptions, most of Crop Districts 7b, 8 and 9, received below normal July rain. The North Battleford - Lloydminster area had less than half of the normal 65 mm to 80 mm and much of that came early in the month. Normal July rainfall is 50 mm to 60 mm for most of the province, 40 mm to 50 mm in southwest and central regions and from 60 mm to 80 mm across the north. Temperatures averaged near July normals for much of the month but did exceed 30°C on numerous days, particularly during the fourth week. Normal highs range from 23°C to 27°C while normal lows range from 11°C to 12°C. The clear skies and warm temperatures during the last ten days were starting to stress crops, particularly in western Crop Districts 7b and 9b. All other areas were looking

forward to a near record crop in 1991.

August

- 13 - Federal Agriculture Minister Bill McKnight announced compensation rates for potato producers whose 1991 crops were ordered to be disposed of if they tested positive to the PVY^a virus. Agriculture Minister Bill McKnight announced May 17, 1991 that a total of \$11 million would be paid out for 1989 and 1990 crop loss compensation to P.E.I., New Brunswick, Ontario and Alberta growers.
- 19 - the National Tripartite Stabilization Program announced a lamb stabilization payment of \$23.37 per lamb for the March 1991-May 1991 program period. The program also announced that no payment would be made for hogs, feeder cattle or slaughter cattle for the second quarter of 1991 because the national average market prices exceeded the support prices. Total payouts to Saskatchewan participants were \$90 thousand.
- August temperatures averaged two to four degrees above the normals while precipitation amounts, generally, were below normal. Temperatures were below normal early in the month but were well above normal from the August long-weekend through to month-end, with daytime highs exceeding 30°C on most days. Normal highs range from 22°C to 24°C and normal lows range from 9°C to 11°C. August rainfall came in the form of showers and varied significantly in amount and in location. Recorded amounts ranged from less than 10 mm at Outlook (15% of normal) to 160 mm (nearly three times normal) at Broadview. Most of southern Saskatchewan received from 75% to 125% of the normal rainfall amounts while the remaining agricultural area received less than half of the normals. For most of the province, normal August precipitation is 45 mm to 55 mm, 70 mm to 75 mm in the northwest, 55 mm to 60 mm along the Manitoba border and 35 mm to 40 mm in the southwest. The month ended with hot, dry and windy conditions and with nearly one-half of the Saskatchewan harvest in the bin.

September

- 4 - The Winnipeg Commodity Exchange began trading options on canola futures contracts. A call option is the right to buy a futures contract at a lower price if the market price declines while a put option is the right to sell at a higher price if the market price rises.
- 12 - Saskatchewan minister responsible for the Saskatchewan Wetland Conservation Corporation Lorne Kopelchuk announced that Assiniboia was chosen as the delivery centre for North American Waterfowl Management Plan (NAWMP) programs for the Missouri Coteau region. The NAWMP is an agreement between Canada, U.S. and Mexico to restore declining waterfowl populations.
- Federal Agriculture Minister Bill McKnight and Saskatchewan Premier Grant Devine announced a one-year \$1.8 million Canada-Saskatchewan Farm Management Initiative. The initiative would be administered by the Agriculture Institute of Management Inc. (AIMS) to develop and deliver training programs to Saskatchewan farmers.
- 13 - Federal Indian Affairs and Northern Development Minister Tom Siddon and Saskatchewan Premier Grant Devine announced federal-provincial agreement on a cost-sharing formula for treaty land entitlements. Under the agreement, an estimated \$431 million would be provided over fifteen years to twenty-seven

Saskatchewan entitlement bands to purchase land and \$50 million would be available for tax compensation to rural municipalities and school divisions.

- 16 - Agriculture Canada released the 1991-92 commodity price forecasts to be used by the provinces to make an interim payment under the Gross Revenue Insurance Plan (GRIP). Interim payments of \$366.6 million were made to Saskatchewan producers during November-December 1991.
- 19 - Federal Member of Parliament Len Gustafson and Saskatchewan Premier Grant Devine announced two Canada-Saskatchewan partnership agreements for rural Saskatchewan. The Partnership Agreement on Water-Based Economic Development would be a five year \$40 million agreement administered by PFRA and the Saskatchewan Water Corporation to encourage the more efficient use of water, preserve water quality and encourage water-related economic activity. The Partnership Agreement on Rural Development would be a four year \$15 million program for diversifying and developing rural Saskatchewan.
- Federal Agriculture Minister Bill McKnight announced that the headquarters of the Farm Credit Corporation (FCC) would be moved to Regina during 1992.
- 23 - Federal Agriculture Minister Bill McKnight announced federal funding of \$1.95 million towards a five year swine research and development program, including construction of a new Prairie Swine Centre facility in Saskatoon. Saskatchewan producers are committed to three-year annual operating funding of \$250 thousand.
- 25 - Murray Cardiff, Parliamentary Secretary to Agriculture Minister Bill McKnight signed the Madrid Declaration which provides support for trade liberalization and the modernization of agriculture in the Americas.
- 30 - estimates of four thousand people attended a farm rally at Rosetown to address the depressed farm income situation resulting from low crop prices. Similar rallies were held in Alberta, Manitoba and other Saskatchewan centres during October. On November 5, 1991, Saskatchewan Premier Roy Romanow announced that the Saskatchewan government had invited leaders of all three political parties in the three prairie provinces to participate in a farm lobby to Ottawa. Government and farm organization representatives lobbied the federal government for increased federal assistance for prairie grain farmers in Ottawa November 26-27, 1991.
- September was warm, sunny and dry throughout most of Saskatchewan. Temperatures averaged from zero to four degrees above the normals while precipitation amounts, generally, were below normal. While temperatures were cool and averaged below normal for a few days at mid-month, most of September recorded average or above temperatures. The first frost, of one to three degrees, was recorded in all but the extreme southeast, southwest and northwest corners on the morning of the 5th. General frosts, down to -11°C, occurred throughout the third week. Normal highs range from 16°C to 20°C and normal lows range from 3°C to 6°C. Across most of Saskatchewan, September precipitation came in the form of isolated showers with a fairly general rain at mid-month. Light snow accompanied the mid-month rain in eastern areas. The heaviest monthly precipitation was along the Manitoba border where 63 mm was received at Hudson Bay and 74 mm at Broadview. Most of Saskatchewan received one-third to two-thirds of normal September precipitation, the eastern third received from three-quarters to nearly twice normal and less than a third of normal was recorded along the Alberta border. At Kindersley, only 5 mm was

received during the month. For most of the province, normal September precipitation is 35 mm to 45 mm, 25 mm to 35 mm in the west and 50 mm to 55 mm in the east. By mid-month most of the 1991 above average quality harvest of 24.7 million tonnes was complete. Eastern areas were delayed by the rain and snow during the third week, but by month-end the harvest was all but complete. The lack of significant precipitation in most of Saskatchewan since mid-July allowed for near ideal harvest weather but left much of the province under very dry conditions.

October

- 2 - Saskatchewan Crop Insurance Corporation announced that interest on outstanding Gross Revenue Insurance Plan (GRIP) premiums would be waived until January 1, 1992. 1991-92 GRIP premiums were due November 1, 1991 and interest would have been charged on premiums after that date.

- 7 - the U.S. duty on live hogs imported from Canada was set at 9.32 cents per pound. The U.S. Department of Commerce review (#5) set the hog countervailing duty for 1989-90 at 9.32 cents per pound while the deposit rate was 2.2 cents per pound during April-December 1989 and 4.49 cents per pound during January-March 1990. The U.S. has imposed duties on live hogs from Canada since 1985 when it ruled that Canadian subsidies hurt U.S. producers by forcing them to compete with lower cost imports.

- 10 - Federal Agriculture Minister Bill McKnight announced an \$800 million farm income assistance program to address income problems in the grains and oilseeds, horticulture, honey and fur sectors. Details of the \$800 million FSAM II (Farm Support and Adjustment Measures) were announced November 21, 1991. Of the \$800 million, \$700 million was for grains and oilseeds, approximately \$80 million for horticulture and the remainder for maple syrup, honey and mink and fox. Saskatchewan received \$297 million of the total FSAM II payment, of which \$70.5 million was paid in 1991.

- 17 - Federal Agriculture Minister Bill McKnight announced a \$754 thousand wool stabilization payment under the Farm Income Protection Act. The payment for the 1990 wool clip was 32 cents per pound.

- 24 - the United States Department of Agriculture announced the 1992-93 loan rates for wheat, feed grains and soybeans. The wheat loan rate was set at \$2.21 per bushel (up \$0.17/bu. from 1991-92), corn at \$1.72 (up \$0.10/bu.), barley at \$1.40 (up \$0.08/bu.), oats at \$0.88 (up \$0.05/bu.), rye at \$1.46 (up \$0.08/bu.) and soybeans unchanged from 1991-92 at \$5.02/bu.

- 30 - Federal Minister of State for Transport Shirley Martin announced a new policy for funding of short-line railways for grain transportation. Funding would be provided only if the service can be at a lower cost than mainline service and is competitive with alternate services. The policy would not apply to Southern Rails Cooperative because the Saskatchewan road/rail operation was a demonstration project and would continue on an experimental basis.

- the Grain Transportation Agency (GTA) announced, after a two year trial program, that the allocation of rail cars for rye and flax will continue to be negotiated by the grain trade on an on-going basis.

- October was generally warm and dry throughout Saskatchewan until the Thanksgiving weekend. Daytime temperatures were mostly above normal, as high as 30°C prior to the long weekend. Nighttime temperatures were normal or below normal for most of the first two weeks. Temperatures turned colder after the long weekend and remained below normal for the rest of the month. Below freezing daytime highs were common throughout the province and lows seldom exceeded 0°C during the last half of October. On Monday the 28th, highs ranged from -17°C to -7°C and lows were -27°C to -10°C. Normal highs for October range from 10°C to 14°C and normal lows range from -2°C to -1°C. With the exception of light showers, the first half of October was dry allowing for the wrap-up of the 1991 harvest of 24.7 million tonnes. Light showers with some snow moved into the province over the Thanksgiving Day weekend and by mid-week snow was reported throughout central and northern areas. Light rain or snow continued on most days until the morning of the 26th when snow moved into the northwest. The snow moved through central Saskatchewan and into eastern regions by the 28th. Most of the area north of a line from Kindersley through Wynyard received two to three times normal October precipitation. North Battleford received nearly four times the normal 16 mm. South of the line, most locations recorded from 15% to 75% above normal rain and snow, however the Aneroid-Regina-Estevan triangle received from 10% to 65% below normal precipitation. For most of the province normal October precipitation is 15 mm to 20 mm and 20 mm to 30 mm in eastern Saskatchewan. At month-end snow depth varied from nil in Regina to 52 cm at Nipawin.

November

- 18 - the National Tripartite Stabilization Program announced a lamb stabilization payment of \$12.33 per lamb for the June-August 1991 program period, a hog stabilization payment of \$16.55 per hog for the third quarter of 1991, a slaughter cattle stabilization payment of \$33.68 per head for July 1991, \$98.09 per head for August 1991 and \$131.06 per head for September 1991. There were no feeder cattle payments for the third quarter of 1991 because the national average market prices exceeded the support prices. Total payouts to Saskatchewan participants were \$5.35 million.
- 25 - the Canadian Wheat Board announced an interim payment of \$8.00 per tonne (\$0.17/bu.) for deliveries into the 1990-91 designated barley pool account. The interim payment was an advance on the final payment and represented money owing to farmers as final settlement on grain marketed through the Canadian Wheat Board (CWB). The CWB announced the results of the 1990-91 pool accounts January 8, 1992. The final payment for designated barley averaged \$10.55 per tonne (\$0.23/bu.) and was in addition to the \$8.00 per tonne (\$0.17/bu.) interim payment. The 1990-91 wheat pool ended in a deficit of \$673.4 million (\$30.34/t.), the durum pool ended in a deficit of \$69.6 million (\$20.36/t.) and the barley pool ended in a deficit of \$0.96 million (\$0.23/t.)
- the below normal temperatures during the last half of October continued during the first ten days of November. Temperatures then warmed up and daytime temperatures were generally above freezing until the 19th when temperatures dropped to below November normals through to month-end. Overnight lows, to -30°C, were common across northern locations during the final week. Normal November highs are -1°C to +3°C in the south and -1°C to -3°C in the north. Normal lows range from -7°C to -10°C in the south and -10°C to -12°C in the north. November precipitation amounts varied in amount, frequency and location. With the exception of light snows in northern areas on a few days,

virtually all of the month's precipitation came during the last week. A general snow, with freezing rain in the south, moved over the province for a few days around the 26th. The precipitation amounts however varied from a trace to 9 mm (at North Battleford). For the month, most of Saskatchewan received from 35% to 85% of normal November precipitation. A fairly wide band from Meadow Lake southeast through North Battleford-Saskatoon-Wynyard-Broadview recorded above normal precipitation. For most of the province normal November precipitation is 10 mm to 15 mm. South of the Swift Current-Moose Jaw-Estevan line normal precipitation is 15 mm to 20 mm and in eastern and northern areas the normal is 20 mm to 25 mm. At month-end snow cover varied from less than 10 cm across south and western regions, 15 cm to 20 cm in the area from Meadow Lake to Yorkton and 20 cm to 30 cm in the north east.

December

- 2 - Saskatchewan Lieutenant-Governor Sylvia Fedoruk read the **Throne Speech** opening the First Session of the Twenty-Second Saskatchewan Legislature. Highlights included announcements of a new budget in the spring session, repeal of legislation which provided for expansion and harmonization of the provincial sales tax, continued pressure on the federal government for farm income assistance, review of the Gross Revenue Insurance Plan (GRIP) and Net Income Stabilization Account (NISA) program, and agriculture debt relief initiatives.
- 8 - news agencies reported that the leaders of Russia, Ukraine and Byelorussia announced dissolution of the **Soviet Union**. The USSR was created in 1922.
- 11 - the Leader-Post reported that European Community (EC) leaders agreed on a political and monetary union treaty. The **Maastricht Treaty** would establish a new twelve member European Union and give provision for a single currency by 1999 and improve co-operation on foreign policy matters by setting rules for joint action.
- 12 - Federal Agriculture Minister Bill McKnight tabled **amendments** to the Farm Products Marketing Act to permit the development and implementation of national **checkoff** programs. The checkoffs would be used to fund market and product promotion and research activities.
- the Western Producer reported the sale of the Maple Leaf Foods Ltd. Saskatoon **poultry processing** plant and hatchery to Plains Poultry, which has operations in Wynyard and Kandahar.
- the Western Producer reported the sale of the Maple Leaf Foods Ltd. Moose Jaw **beef slaughtering and processing** operations to Western Canada Beef Packers Ltd. The company announced in April that it was getting out of the business and would close its operations at Moose Jaw, Lethbridge, Red Deer and Calgary if buyers could not be found. All but the Moose Jaw plants were closed during the **summer**.
- 19 - the Canadian Dairy Commission announced a producer-processor funded **rebate** program to manufacturers which use dairy products as ingredients in their finished food products. The rebate would be aimed at manufacturers facing increased import competition as tariffs are lowered under the Canada-U.S. Trade Agreement. The program would operate during the first six months of 1992 while a working group reviewed options for the long term.

- CN and CP Rail announced their **freight rate incentive plans** for 1992-93. Freight rate reductions at CP Rail would range from \$1.00 per tonne for 20-car blocks to \$3.50 per tonne for 100-car blocks. At CN Rail, reductions would range from \$1.50 per tonne for 18-car blocks to \$3.50 per tonne for 100 cars.
- the below normal **temperatures** and the snow at the end of November continued during the first week of December. Overnight lows, to -35°C, were common across the province during the first week. Temperatures moderated and were normal or above normal for the remainder of the month. Temperatures seldom approached -20°C after mid-month and above freezing temperatures were common throughout the last half of December. Normal December highs are from -2°C to -8°C in the south and -8°C to -11°C in the north. Normal lows range from -13°C to -18°C in the south and -18°C to -22°C in the north. With few exceptions, virtually all of the month's **precipitation** came during the first week, a continuation of the general snow which started at the end of November. After mid-month, only trace amounts of precipitation were recorded. For the month, most of Saskatchewan received from one-half to two-thirds of normal December precipitation. Areas in the northeast and in west central Saskatchewan received less than one-half normal while the area from Moose Jaw through Broadview and Yorkton had above normal December snowfall. Normal December precipitation is 20 mm to 25 mm across most of the province and 15 mm to 20 mm in central and west central areas. At month-end **snow cover** was less than 5 cm across south and western regions, 10 cm to 15 cm in the northwest and up to 35 cm in eastern areas. Due to the below normal snowfall and above freezing temperatures there was no snow cover in many areas of west and southwest Saskatchewan.

*Effective the 1984-85 crop year the Canadian Grain Commission allowed operators of primary elevators to licence two or more adjacent facilities, which were under the control of a single manager, as a single primary elevator.

**Capacity is measured in tonnes of wheat storage capacity.

*The operating period of the Western Grain Stabilization Program was changed from a calendar year to a crop year, effective August 1, 1983. Producer levy collected for 1983-84 is the period January 1, 1984 to July 31, 1984. This procedure was required to permit the transition from a calendar year to a crop year calculation.

**March 1991 interim payout. Final calculation indicated an overpayment of \$41 million was included in the interim payout.
